Message from IKHAPP

Welcome to the IKHAPP community and our first newsletter! The newsletters will serve as a regular update on recent publications, events and news within the field of plastic pollution. The most significant development in this field 2022 has been the [UN Environment Assembly \(UNEA\)](#) adoption of a resolution to develop a legally binding instrument to end plastic pollution. An [Intergovernmental Negotiating Committee \(INC\)](#) was established with the aim to complete a draft of the agreement by the end of 2024. As policies and scientific insights evolve rapidly, there will be a need for enhanced access to transparent, independent and high-quality science, as well as scientific and technical cooperation. IKHAPP will contribute to this process and support the global treaty negotiations.

Updates

A NEW REPORT by the United Nations Human Settlements Programme (UN-Habitat), NIVA and IKHAPP highlights the role of the more than 15 million people informally collecting and recovering solid waste globally to end plastic pollution. The report titled **Leaving no one behind: How a global instrument to end plastic pollution can enable a just transition for the people informally collecting and recovering waste** was launched in Nairobi, Kenya, on Tuesday 22 November 2022 in association with an event under the UNDP. The report presents possibilities for how the negotiation and implementation of a global instrument on plastic pollution can be designed to promote the transition to sustainable production and consumption of plastic in a way that is as fair, inclusive, and equitable as possible to the IWRS, generating and preserving decent work opportunities and leaving no one behind. Read the report [here](#).

Upcoming event

WEBINAR
Launch of the Nordic report: Addressing microplastics in a global agreement on plastic pollution

Date: 10th January 2023
Time: 1400 - 1530 CET
Venue: Zoom Meeting

This webinar launch will serve as a starting point for discussing the Plastics Treaty and the outcomes of the 1st meeting of the Intergovernmental Negotiating Committee in Uruguay, November 2022.

Webinar agenda and information on confirmed speakers to follow!
Register your participation for the webinar below.

IKHAPP **NIVA** **Nordic Co-operation**
Norwegian Institute for Water Research

WEBINAR: Launch of the **Nordic Report on the role of microplastics in a global agreement on plastic pollution**. The upcoming webinar is organised by the Nordic Council of Ministers, NIVA and IKHAPP.

The webinar will be held on **10 January 2023, 14.00-15.30 CET digitally**. The webinar will serve as a starting point for discussing the Plastics Treaty and the outcomes of the 1st meeting of the Intergovernmental Negotiating Committee in Uruguay, November 2022.

The [Nordic report](#) addresses how microplastics can be tackled in a global treaty to end plastic pollution, describes current regulations and identifies possible measures.
