

Signatories of the Scientists' Declaration for the Global Plastics Treaty

About: To protect human health and the environment, these independent scientists from all corners of the world are calling on members of the United Nations Intergovernmental Negotiating Committee to agree on a comprehensive and ambitious global plastics treaty that uses the available and robust scientific evidence to end plastic pollution by 2040.

These signatories are independent scientists with expertise on plastics who have declared themselves to be free of conflicts of interest in the plastics supply chain. Launched by a group of international, independent plastics scientists, the declaration has been signed by a broad community of scientists.
